Do your Linux administrators spend too much time on low-value tasks? Would you like a best-in-class infrastructure management solution?

Whether you are new to Linux or already have an existing Linux environment, SUSE Manager is the ideal management tool to deploy, patch, baseline, monitor and configure your servers. Key functionality available within SUSE Manager includes:

- *Software/patch management*
- *Deployment management for virtual and physical servers, as well as the creation of images (KIWI) and containers*
- *Configuration management using SALT*
- *Take monitoring to the next level with Prometheus/Grafana*

Learn about the capabilities and business benefits of this solution and jumpstart your implementation with this targeted and impactful SUSE Assist engagement.

Engagement Overview

Solution experts from SUSE Global Services will work with you and your team to deploy and configure SUSE Manager based on our best practices from real-world experiences. We'll explore your current processes for deployment and maintenance, discuss possible improvements and then mirror the processes into SUSE Manager. In addition, our team will conduct a short knowledge transfer session covering SUSE Manager and SALT.

On completion of the on-site work, you will receive tailored summary documentation that captures details of the deployment work carried out, as well as best-practice guidance and identification of possible next steps.

Target Participants

This engagement should include your organization's Linux administrator—those that are new to Linux and those with established Linux experience. A Linux certification or equivalent knowledge is a plus.

Benefits

Realize rapid ROI from SUSE Manager. Engaging with SUSE Global Services in a SUSE Assist: Deployment Service for SUSE Manager will give your team confidence in their implementation. This service offering can provide:

- *A well-structured engagement using a tried-and-tested approach*
- *The opportunity for hands-on knowledge transfer and the benefit of best-practice guidance from our team of experts*
- *The ability to free up your staff from low-value manual administration tasks*

“With SUSE Manager, we have cut our maintenance costs and improved IT management productivity.”
