myBrand 74
SAP is the world leader in enterprise applications in terms of software and software-related service revenue. SAP wanted to expand its offerings and launch a cloud platform to develop SAP solutions.

For its SAP HANA Enterprise Cloud service, SAP maintains approximately 6,600 servers with over 12,000 CPUs and 16,000 virtual machines running SUSE Linux Enterprise Server and SUSE Linux Enterprise Server for SAP Applications.

Using SUSE technologies helps SAP to offer extremely high availability on its cloud platform as well as reduced total ownership costs and optimized licensing.

“In part due to the great stability of SUSE Linux Enterprise Server, our system availability is 99.999 percent.”

MARTIN HEISIG
SENIOR VICE PRESIDENT
SAP HANA ENTERPRISE CLOUD SAP SE
Organizational Overview

The world’s 3rd largest independent software manufacturer based on market capitalization.

Headquarters: Walldorf, Germany  
Revenue: $20.8 Billion

SUSE Products: SUSE Linux Enterprise Server for SAP Applications
APA IT

www.apa-it.at

APA IT is one of the leading IT service providers for the media industry in Austria, responsible for the IT of the Austrian News Agency as well as numerous other media enterprises.

APA IT wanted to centralize and integrate its business processes and systems especially in the accounting departments.

APA-IT teamed up with SUSE Gold Partner XIT-cross information technologies to implement its new SAP landscape powered by SAP HANA on SUSE Linux Enterprise Server for SAP Applications.

Thanks to the simple integration of the SAP landscape into the existing IT environment and operations processes, APA-IT obtains the advantages of a finely tuned operating system without adding complexity to its management and maintenance procedures.

CenturyLink

www.centurylink.com

CenturyLink is a global communications and IT services company focused on connecting its customers to the power of the digital world.

As the traditional fixed-line consumer business continues to shrink and fresh competition in non-regulated markets eats into margins, many telcos are seeking scale through mergers and acquisitions.

To support its revenue-growth plans, CenturyLink migrated SAP Business Suite to the SAP HANA database on the IBM Power platform running on SUSE Linux Enterprise Server for SAP Applications, accelerating reporting and projects, and simplifying acquisitions.

Results included faster financial reporting, greater flexibility cuts time-to-value for corporate acquisitions and delivering economies of scale sooner.

“With IBM Power as our platform for SAP HANA, we can adapt to unexpected developments or new requirements and keep moving forward to deliver added value to the business.”

CTAC

www.ctac.nl

Ctac is a Total Solution provider that offers end-to-end cloud application hosting and services for clients in retail, manufacturing, real estate and professional services sectors.

Ctac needed to find the optimal combination of hardware and operating systems to run its clients’ applications as efficiently and cost effectively as possible.

Ctac thus chose IBM Power System servers running SUSE Linux Enterprise Server for SAP Applications. Ctac selected SUSE Linux Enterprise Server for SAP Applications as its preferred operating system for SAP HANA. The agile and scalable in-memory cloud offering creates new business opportunities and helps customers to benefit from real-time analytics cost-effectively while reducing deployment time by 95 percent. It also accelerated deployment of new Linux instances to just 10 minutes.

“With SAP HANA on IBM Power Systems we can provide more reliable services with less operational support required.”

Lenovo

www.lenovo.com

Founded in 1984 in a guard shack in Beijing, Lenovo has grown to become China’s leading personal technology company, and the world’s largest PC vendor.

Lenovo’s China division found that its aging infrastructure could no longer deliver the performance necessary to support the company’s business-critical SAP applications, which it uses to manage practically every element of its operations and finances.

Using SUSE Linux Enterprise Server for SAP Applications, Lenovo has taken back control of its IT development strategy. SUSE Manager automates patching and system upgrades, completely eliminating the need to manually build and maintain patch sources.

“We used to spend approximately three months each year on manual patching; with SUSE Manager we’ve brought that down to two weeks. Through patching automation alone, we’ve been able to cut the Linux administrator workload by at least 50 percent.”

www.itelligencegroup.com

Itelligence is a leading international full-service provider focusing on SAP deployments, offering consulting, licensing, application management services, hosting services, and proprietary industry solutions. Itelligence Poland set out to offer superior SAP HANA hosting services to its clients. Could the company find the magic mix of enhanced operational excellence combined with greater cost-efficiency?

Itelligence Poland launched SAP ERP powered by SAP HANA hosting services on IBM Power Systems servers and IBM FlashSystem storage, using advanced virtualization to make dramatic efficiency gains.

Using IBM & SUSE Solutions, results included accelerated provisioning of new client systems from 2 days to a few hours, reduced operational costs and slashed latency by a factor of 5 to deliver stellar service to clients.

“IBM Power Systems and IBM FlashSystem enable us to offer outstanding SAP solutions and our world-class SLAs at very commercially attractive fees.”

WIIT offers platform-as-a-service (PaaS) environments to host the critical core business applications of approximately 400 companies worldwide.

To help companies focus on what matters most—selling and boosting profit, cloud company WIIT deployed SAP HANA running on SUSE Linux Enterprise Server for SAP Applications.

By working with SAP and SUSE, WIIT succeeded in delivering stellar customer service, which boosts loyalty and fosters growth.

Results included a full supported, easy to use, and high performing platform decreasing the number of incidents on customer systems.

“What sealed the deal for us was the high-quality pre- and after-sales support that we received from SUSE: it was genuinely a whole new level of expertise and assistance, and convinced us to deploy this platform.”

Symmetry

Symmetry manages complex SAP implementations on a global scale for more than 200 of the world’s leading enterprises in challenging and heavily-regulated industries such as healthcare, financial services, retail, manufacturing, automotive and beyond.

Symmetry needed a stable, scalable operating system for its proprietary SAP HANA cloud to meet growing customer demand for the HANA in-memory computing platform and to differentiate itself from competitors. Therefore, Symmetry decided to deploy SUSE Linux Enterprise Server for SAP Applications, the SUSE Linux Enterprise High Availability Extension as well as the SUSE Linux Enterprise Live Patching.

Since then, Symmetry benefits from high performance levels, maximizing service availability and eliminating downtime.

“When it comes to performance, SAP either runs well or it doesn’t. That’s how we differentiate ourselves. SUSE is a piece of the puzzle for us delivering guaranteed performance for customers who are running production SAP workloads.”

T-Systems is one of the world’s leading vendor independent providers of digital services, offering integrated solutions for business customers. As a Deutsche Telekom subsidiary, T-Systems is one of the largest SAP hosting providers worldwide and supports more than 7 million users as well as more than 800 terabytes of HANA databases.

In order to provide their customers a cloud foundation where they can deploy their applications, T-Systems is running SAP HANA on SUSE Linux Enterprise Server for SAP Applications as well as making use of SUSE CaaS.

Thus, T-Systems benefits from a close partnership with SUSE, ensuring high reliability, in time and in quality service as well as no latency.

“T-Systems is committed to deliver in quality service. In that regard, we highly appreciate the long-term partnership that we have with SUSE for years, because they allow us to deliver, in time, in quality service, seamless integrated to our customers.”

Itelligence

itelligence is a global SAP Platinum Partner with over 30 years’ experience across 25 countries. In Denmark, itelligence provides SAP hosting, consultancy, training and other services.

When itelligence migrated its SQL Server databases to a SAP HANA-based platform running on SUSE Linux Enterprise Server for SAP Applications, they were so impressed by SUSE that they decided to move its SAP Business Suite applications onto the SUSE Linux Enterprise platform too.

Thus, moving its SAP Business Suite applications to SUSE Linux Enterprise Server has not only reduced management overhead for itelligence, but also improved performance significantly: The time to generate reports could be reduced from 10 hours to just 30 minutes. Furthermore, the high availability clustering technology that is built into the SUSE operating system enables itelligence to offer clients extremely tight SLAs. Availability rates of 99.999% or above are now achievable.

“When we looked at other enterprise Linux vendors, their licensing terms were not as advantageous compared to SUSE. And when we spoke to other SAP users, everyone agreed that SUSE Linux Enterprise was by far the best choice.”

Lenovo Global Technology Germany GmbH

www.lenovo.com

Lenovo is a multinational technology company that offers a broad range of end user devices and data center products, solutions and services to consumers and businesses around the world. Lenovo Global Technology Germany GmbH is the company's German data center subsidiary based in Stuttgart.

With data volumes growing day by day, so too does the complexity of the corporate data landscape. Many organizations spent too long managing, collecting and cleansing their data, and not enough time analyzing it, preventing them from unlocking its true value. For that reason, Lenovo developed in partnership with SAP and SUSE Lenovo Intelligent Insights, an end-to-end solution that is built on Lenovo hardware (Lenovo ThinkSystem servers and RackSwitch networking) with SAP Data Hub software and SUSE Linux Enterprise Server, deployed on SUSE CaaS Platform and integrated with SUSE Enterprise Storage.

Thus, organizations benefit from an all-in-one, end-to-end solution that includes everything from infrastructure to software to support services.

“Built on SUSE technology, Lenovo Intelligent Insights with SAP Data Hub empowers organisations to take control of the growing volume, variety, and velocity of data they are faced with, and to use that data to their advantage.”

Bestore

www.517lppz.com

Bestore, a famous snack enterprise in China had initiated the SAP HANA solution project for its full-channel retail system construction.

In addition to optimizing and integrating its existing information systems, Bestore aimed to build a new platform to further reduce its enterprise operation risks and management and control costs, accelerate its internal management revolution, and make the new platform the enterprise’s core competitiveness. The explosive development of Bestore’s services required a trustworthy IT infrastructure solution supplier.

Using Huawei and SUSE Solutions, the customer’s IT system efficiently supports a daily sales amount of USD 19.2 million and a threefold service volume from previous year. The analysis performance of the service system increased 100 times ensuring system stability and system continuity.

“We chose SAP as our core partner of the service layer to improve our operation and management capabilities. Meanwhile, we chose Huawei as our strategic partner of the ICT infrastructure layer. Huawei not only provides industry-leading ICT solutions but also industry-leading IT governance capabilities. I believe our collaboration with SAP and Huawei will further improve our enterprise management capabilities and eventually enable us to provide better services for our customers.”

Wing On

https://shop.wingon.hk/en

Wing On is one of Hong Kong’s leading department stores. The company also manages a portfolio of commercial property investments, with properties located in Hong Kong, the United States of America, and Australia.

When Wing On embarked on a digital transformation, they decided to implement SAP S/4HANA running on SUSE Linux Enterprise Server for SAP Applications. Furthermore, to enhance its infrastructure management, Wing On decided to deploy SUSE Manager – enabling automated monitoring, patching and reporting on its systems.

With SAP S/4HANA running on SUSE Linux Enterprise Server for SAP Applications, Wing On has achieved its goal of shaping future-proof digital workflows – protecting it from the risks of an aging workforce. Also, due to SUSE Manager, Wing On was able to cut their maintenance cost and improve IT management productivity.

“With SUSE Linux Enterprise Server for SAP Applications, we’ve consolidated our production environment from 50 physical servers to just three - a 94 percent reduction.”

University of Haifa

University of Oldenburg

Technical University of Munich
Established in 1972, the University of Haifa is a public research university in Israel. It is a leading university in humanities, law and natural sciences.

The university recognized an opportunity to deliver substantial savings by migrating its mission-critical SAP business systems to x86 servers running SUSE Linux Enterprise Server for SAP Applications.

By working with HPE & SUSE, the university has reduced operational spend, created a robust foundation for its transition to in-memory analytics on SAP HANA and frees time for value-added analytics.

“Our SUSE and SAP solutions will help us to offer our staff the tools they need to deliver outstanding learning experiences to students.”

University of Oldenburg

The Carl Von Ossietzky University of Oldenburg is a university located in Oldenburg, Germany. It is one of the most important and highly regarded educational facilities in northwestern Germany and specializes in interdisciplinary and sustainable development studies and renewable energy studies with focus on solar and wind energy.

The university wanted to provide a modern IT infrastructure for the Business Computing students enabling them to develop practical research projects. The university applied for research funding and financial support for a SAP HANA appliance, followed by a tendering process which was successful.

Using HPE ConvergedSystem for SAP HANA running on SUSE Linux Enterprise Server for SAP Applications, results included fast data analysis, stable operation and professional support for the appliance from HPE.

Technical University of Munich

www.tum.de

Technical University of Munich (TUM) is one of the world’s leading technical universities, combining top-class facilities for cutting-edge research with unique learning opportunities.

TUM wanted to use the available resources as efficiently as possible to provide sophisticated services with low operating costs at an attractive price. TUM also wanted to enable the SAP University Competence Center (UCC) to provide reliable cloud services without a large team of system administrators.

The SAP UCC uses IBM infrastructure and automation technology to provide scalable, reliable and cost efficient cloud services to its 247 customers in the SAP University Alliance Program.

Benefits include reduced provisioning time by 80 percent to just 30 minutes for systems running on SUSE Linux Enterprise Server for SAP Applications, cut storage latency substantially with a reduction of up to 75 percent and achieved 99.99 percent system availability with its new infrastructure.

Fitch Ratings

www.fitchratings.com

Fitch Ratings is a leading provider of credit ratings, commentary and research. As part of a cloud-first strategy, the company decided to migrate to SAP HANA on Amazon Web Services (AWS).

Fitch Ratings’ partner for the migration, Protera Technologies, advised that the best option for running SAP HANA in AWS was on SUSE Linux Enterprise Server for SAP Applications. Fitch Ratings was using Red Hat Linux for its enterprise applications and decided to switch from Red Hat to SUSE for its SAP HANA applications.

Using SUSE Solutions, Fitch Ratings decreased the time it took to complete process chains from hours to minutes and delivered functional environment in weeks instead of months built on AWS infrastructure.

“It gives me a lot of comfort that SUSE is one of the early adopters of the HANA platform and have a history of working with SAP HANA. Going with HANA on SUSE mitigates our risk and gives us the best and most optimal platform to run our SAP enterprise applications.”

Pearl Global Industries

www.pearlglobal.com

Operating across South Asia, Pearl Global Industries is among India’s largest garment exporters, and serves some of the world’s most renowned fashion brands.

A period of rapid growth placed strain on the IT infrastructure supporting Pearl Global Industries’ mission-critical systems. To drive greater agility and establish a robust roadmap for future expansion, the manufacturer upgraded its SAP applications and migrated to SUSE Linux Enterprise Server for SAP Applications operating system, running on Hitachi Blade 500 servers—enabling further expansion.

Using SUSE Solutions, Pearl Global Industries elevated performance levels by 20 percent, reduced time taken for key reports from 45 minutes to 5 minutes and automated calibrating system configurations.

“Thanks to SUSE, we are better placed to meet the future needs of our clients, and we have the tools to grow and expand our business.”

EspacioRack is a well-known ISP in Spain. Running the first data center certified by SAP cloud in Spain, EspacioRack provides enterprises with HANA services, IT infrastructure, and office software.

As a core partner of SAP in Spain, EspacioRack plans to build SAP HANA Enterprise Cloud to server SAP enterprise customers. Huawei provides EspacioRack with SAP HANA solutions and the virtualization software VMware as HANA Enterprise Cloud infrastructure solutions.

Using Huawei and SUSE Solutions for SAP HANA, EspacioRack achieved high performance and high reliability in their business operations. EspacioRack has increased its revenue by cooperating with Stratsys (service partner) and Huawei (hardware partner) to provide one-stop SAP application services for customers.

China Mengniu Dairy

www.mengniuir.com

China Mengniu Dairy Corporation (Group) Co. Ltd is an important leading enterprise in the national agricultural industrialization cause and also a leading enterprise in the dairy industry. The consumer-centric Mengniu focuses on developing dairy products that are suitable for Chinese people and of more diversified types and with better quality.

Mengniu needed to build a SAP HANA system to support its real-time business decision-making to support its rapid service development.

Using Huawei & SUSE Solutions, Mengniu's service system experienced a performance improvement by nearly 100x. The new system supports real-time data analysis and implements an optimized, professional chemical product distribution system, helping Mengniu reduce operation costs. The new system also requires less subsequent O&M costs and supports smooth upgrades, protecting Mengniu's investments.
China Mengniu Dairy

Organizational Overview

The company has built a large milk and dairy product chain that integrates milk source construction, and dairy production, sales, and R&D. Its scale and intensive pasture milk sources reach over 100 percent, which is industry-leading. By the end of December 2016, the Group’s annual production capacity reached 9.21 million tons.

Bosch Group is a worldwide operating company, employing 374,000 people and generating annual revenues of EUR 70 billion. Bosch operates its own IT division employing approximately 4,000 people.

To stay ahead of the game with fresh innovation, business users at Bosch need super-fast, highly personalized IT services and the ability to enhance and add functionality on-the-fly.

With SAP S/4HANA, Bosch gains deep operational insight. Massive performance from the underlying IBM® Power Systems™ servers and SAP HANA database support rapid analytical queries.

Using IBM & SUSE Solutions, business users can set up systems quickly with minimal support from IT, unlocking substantial time savings and fostering a rich culture of innovation to drive commercial success.

“Using IBM POWER8 systems for the SAP HANA deployment gives us much more flexibility than we had before.”

United Breweries

United Breweries Limited dominates the Indian beer market, with a market share of around 50 percent. Its flagship brand Kingfisher has achieved international recognition, selling in 52 countries across the world and leading the way among Indian beers in the global market.

To meet strict regulations on the distribution of beer, United Breweries must generate compliance reports but as data volumes exploded, generating the reports on time became a tough challenge.

By migrating its existing SAP HANA database to the latest IBM Power Systems servers, United Breweries dramatically accelerated data analysis and report generation.

Using IBM & SUSE Solutions, back-end jobs run 50 percent faster, speeding report generation and simplifying compliance. The IBM server platform boosts scalability, providing headroom for future growth.

“IBM has been a strategic partner in our SAP journey, and we continue to work closely with them.”

P.T. Diamond Cold Storage

www.diamond.co.id

Founded in 1974, PT. Diamond Cold Storage is an established Indonesian food processing company focused on dairy-based and frozen food products.

To remain at the forefront of its industry, PT. Diamond Cold Storage wanted a solution that could support the adoption of mobile and IoT functionalities – paving the way to automated, ultra-efficient operations.

Working with InfoTech, PT. Diamond Cold Storage upgraded its SAP ERP solution to the SAP HANA in-memory database, which supports integration with cutting-edge mobile and IoT solutions, running on IBM POWER8 servers. SAP HANA enables PT. Diamond Cold Storage to launch mobile technologies, boosting efficiency and cutting costs. The solution supports speed-of-thought analytics, driving smarter decision-making.

“I am very confident that with the support of SAP HANA on IBM POWER8, I can look forward to a lot of growth in my future business.”

FARYS provides drinking water to end users in a large part of Flanders. The public sector firm also operates local sewerage networks and manages a number of sports facilities.

To succeed in an increasingly stringent regulatory environment, water utilities must use their data more effectively than ever. However, as the volume, speed and diversity of data grow, delivering these capabilities to the business can be a tough challenge.

Using SUSE, results included automated patching and provisioning, savings up to €95000 on high availability capabilities and cuts query time by 98 percent.

“If we had chosen to deploy our previous high-availability platform, it would have cost us around €1000000. By selecting the SUSE Linux Enterprise High Availability Extension, our only expense was three days of consulting time during the deployment saving us €95000.”

Abeam Consulting

www.abeam.com

Abeam Consulting provides management, business process consulting, IT consulting and outsourcing services, and has a presence in 33 countries. Fast-growing ABeam Consulting avoided putting the brakes on corporate expansion by transforming its core application landscape to accommodate more data.

With a new suite of SAP applications running on SUSE Linux Enterprise Server for SAP Applications the company enjoys greater stability and performance, while SUSE Manager keeps management simple.

The new environment is used to support internal operations and to launch new SAP solutions for clients, giving ABeam Consulting and its customers faster time-to-value.

“The SUSE solution contributes to our ability to provide stable, high-performance IT services to our employees, which will enable them to work more productively.”

Imperial Health Services

www.ihs.za.com

Imperial Health Sciences provides logistics and supply chain services to support the healthcare industry in Africa.

To unlock the operational and cost-efficiency benefits of a large acquisition, Imperial Health Sciences decided to rationalize its SAP landscape. The company migrated to a central platform based on SUSE Linux Enterprise Server for SAP Applications enabling an instant 40 percent increase in SAP application performance, a 90 percent reduction in total cost of ownership and higher-availability for life-and-limb systems.

“SUSE Linux Enterprise Server for SAP Applications has helped us to reduce the total cost of ownership for our IT infrastructure by 90 percent.”

Gulftainer

www.gulftainer.com

Gulftainer is a major privately-owned, independent port management and third-party logistics company.

To get new sites up and running quickly, the company wanted a highly scalable, high-performance infrastructure to support its mission-critical SAP and MACH application landscape.

Gulftainer deployed multiple Lenovo System x servers to support its new SAP HANA environment, and a Lenovo Flex System solution at its corporate office. Easy scalability enables Gulftainer to grow quickly and cost-effectively. High performance ensures that mission critical applications run smoothly along with lower power and cooling costs.

“With Lenovo System x and Flex System, we have gained innovative solutions that will enable us to meet future demand.”

Artoni Transport

www.artoni.com

An Italian logistics company, Artoni Transporti handles 35,000 shipments daily for 13,000 clients. The company uses SAP software to know the current location of every shipment. That’s critical. But the traditional servers used to host SAP were costly, slow, and difficult to scale.

Artoni switched from traditional servers to infrastructure-as-a-service (IaaS) from Cisco partner Dedagroup ICT Network. Dedagroup’s cloud platform is built on Cisco Unified Computing System (UCS).

Using Cisco & SUSE Solutions, SAP transaction speeds are ten times faster. The new platform better manages peak loads. Batch jobs take 30 percent less time to complete. And with usage-based billing, costs dropped by 50 percent.

“Before, we were bound to costly and inflexible traditional outsourcing contracts. Now, we pay by processing capacity in the cloud.”

Siam City Cement

Siam City Cement, based in Bangkok, has supported Thailand’s real estate development both commercial and residential for more than 45 years.

The company, with its vision for the growth, wanted to build a digital business using big data analytics and embrace the Internet of Things (IoT).

The firm deployed Cisco UCS® Servers and Cisco Nexus switches at new data center and disaster recovery site.

Using Cisco & SUSE Solutions, Siam City Cement easily met its deadline and made the switch to the new data center with only 15 minutes of downtime. Results also included accelerated application delivery time by more than 2 months, empowered staff to deliver the best possible customer experiences and positioned the company to scale for next 5 to 10 years.

Service Informatique de l’Entité Neuchâteloise (SIEN) provides IT services for a range of public authorities across the region. These information and infrastructure services support everything from state and municipal government bodies to schools, healthcare providers and social services organizations.

To help government decision-makers channel state and municipal budgets where they are needed most, SIEN wanted to empower them with lightning-fast reporting and analytics capabilities. Today, SIEN is working with SUSE to deploy SAP BusinessObjects Planning and Consolidation on SAP HANA, running on the high-performance SUSE Linux Enterprise Server for SAP Applications platform.

Using SUSE, results include 97 percent faster analytics jobs, 24/7 live public facing services, protecting mission critical data and facilitating effective recovery in the event of unplanned downtime.
