

Data Sheet

Fujitsu Compact Appliance for the SAP HANA® Platform

Pre-configured and optionally pre-installed infrastructures for real-time data access with SAP Business One analytics powered by SAP HANA and SAP Business One application, version for SAP HANA.

Introduction to SAP HANA Offerings for SAP Business One Customers

The rapidly growing amount of data does not only have an impact on large enterprises. Small and medium size organizations face similar challenges. The mass of data they have to deal with may be less extensive, but the complexity of different data types from various sources requires corresponding processes. Hence SAP® provides such organizations with solutions based on innovative in-memory technology:

Side by side approach for existing customers Customers, who already use the SAP Business One solution, may add the SAP Business One analytics powered by SAP HANA add-on to accelerate analytics and reporting.

Integrated solution for new customers

New customers already benefit from the SAP Business One application, version for SAP HANA. This is an integrated approach which combines the proven SAP Business One functionality with the innovative SAP HANA database in one system.

Introduction to the Fujitsu Infrastructure and Service Offering

Fujitsu supports existing and new SAP Business One customers with SAP-validated infrastructures based on cost efficient industry standard PRIMERGY® servers.

Server Options

Depending on the individual office or datacenter proximity, customers can choose between a tower model PRIMERGY TX300 S8 or a rack option PRIMERGY RX350 S8. Both models are equipped with two Intel® Xeon® E5-2670 2,6GHz CPUs and can be provided with 64GB, 96GB, 128GB or 256GB main memory.

Staging Options

The complete appliance offering consists of the I/O optimized server infrastructure pre- installed with the SUSE® Linux® operating system and the selected SAP software stack.

The dedicated SAP HANA staging center in the award winning Fujitsu factory in Augsburg ensures a highly professional pre-installation of the listed software components with optimal hardware settings. However the SAP- validated infrastructure can also be obtained without any pre-installation or just the SUSE Linux operating system implementation.

Complementary Service Offerings

A set of optional services has been designed to complement the implementation of in- memory technology in SAP Business One projects e.g.:

- SAP Business One Migration
- Hardware installation service
- Extended hardware maintenance
- Extended SUSE® Linux® maintenance
- Financial services

Features and benefits

Main features

- PRIMERGY rack and tower option
- Four main memory options (from 64 GB up to 256 GB)
- Server pre-configuration and installation
- Optional factory staging (SAP HANA software and/or SUSE Linux)
- Free choice and combination of server, staging and complementary service options

Benefits

- Choice of best fit for customers' data center environments
- Right size for all different project sizes and growth plans
- Optimized hardware settings to leverage SAP HANA functionality
- High quality pre-installation for rapid and non-disruptive project implementation
- Solutions tailored to individual needs regarding size, implementation process and operation

Technical details

Hardware

Tower Configuration	PRIMERGY TX300 S8 Server
Size XS	2 * CPU E5-2670 8C/16T 64 GB RAM
Size S	2 * CPU E5-2670 8C/16T 96 GB RAM
Size M	2 * CPU E5-2670 8C/16T 128 GB RAM
Size L	2 * CPU E5-2670 8C/16T 256 GB RAM

Rack Configuration	PRIMERGY RX350 S8 Server
Size XS	2 * CPU E5-2670 8C/16T 64 GB RAM
Size S	2 * CPU E5-2670 8C/16T 96 GB RAM
Size M	2 * CPU E5-2670 8C/16T 128 GB RAM
Size L	2 * CPU E5-2670 8C/16T 256 GB RAM

Software

Operating system (Optional) SUSE® Linux Enterprise Server (SLES) 11 SP2

SAP Business One Apache Tomcat 6.0Query 1.4.4

analytics software (optional) MS SQL Server® JDBC 3.0
SAP JVM 6.1
SAP HANA CLIENT 1.00
SAP HANA DATABASE 1.00
SAP HANA INFORM. COMPOSER 1.0
SAP HANA STUDIO 1.00
SAP HOST AGENT 7.20

SAP Business One powered by SAP HANA software (optional) SAP HANA DATABASE 1.00 revision 36
SAP HANA CLIENT 1.00 revision 36
SAP HANA STUDIO 1.00 revision 36
SAP Business One 8.82 FOR SAP HANA

The SAP software can be optionally supplied pre-installed, but it is not part of the contract with Fujitsu. The software must be purchased by the customer from SAP AG. Only the specified SAP HANA software can be pre-installed. Any other SAP software is provided by the customer and installed at the customer site.

Delivery, implementation, documentation and support

User Interface	English
Installation	Optionally supplied pre-installed ex works
User Requirements	Knowledge of SAP Business One software is a prerequisite.
Warranty	Class: C Only warranty ensured by components
Media Set/ Documentation	1 Blu-ray and installation guide
Ordering and Delivery	This offering is available from authorized Fujitsu distributors or regional branch offices of Fujitsu.
Contact	Fujitsu America, Inc, Sunnyvale, California

About Fujitsu America

Fujitsu America, Inc., is a leading ICT solutions provider for organizations in the U.S., Canada and the Caribbean. Fujitsu enables clients to meet their business objectives through integrated offerings and solutions, including consulting, systems integration, managed services, outsourcing and cloud services for infrastructure, platforms and applications; data center and field services; and server, storage, software and mobile/tablet technologies.
